

WE CAN WIN THIS

Based on this presentation, a California school board voted 3:1 in favor of rescinding vaccine mandates.

EXECUTIVE SUMMARY (1 of 2)

The vaccines kill more people than they can be expected to save for all groups, especially young adults. So far, over 150K Americans have been killed by the vaccines. We can show this 8 different ways. There is no doubt that the vaccines are the cause of all of these deaths because we can prove this with the Bradford-Hill criteria.

The FDA and CDC have deliberately ignored the safety signals: [assuming the VAERS URF=1](#), ignoring clear fraud in Phase 3 trials, and refusing to do autopsies. They look the other way when highly respected pathologists such as Peter Schirmacher have determined that the vaccines are deadly. Government-led censorship is used to silence critics. Fear and intimidation techniques are used against doctors who try to speak out.

EXECUTIVE SUMMARY (2 of 2)

Early treatment can get us to near zero COVID without any of the safety risks associated with the vaccine. They are superior to vaccination in virtually every aspect. We've had 99% effective treatments since March 2020 and now they are even better (99.76%).

The one thing every hospitalized COVID patient has in common: they didn't use a proven early treatment protocol.

Nobody in America will debate our team on the safety of the vaccines because nobody in America wants to admit they were wrong.

The vaccines should be immediately **HALTED**. Instead, we are doing the opposite by mandating deadly, experimental vaccines that were never properly tested.

**Nobody is paying
attention
to the elephant in the
room**

The vaccines are
killing more people
than they are saving

Killed: 150K¹
Saved: 10K²

¹[Estimating the number of vaccine deaths](#) computes over 150K excess deaths due to the COVID vaccines 8 different ways.

²[Pfizer's 6 month phase 3 trials result](#) clearly shows 1 life saved for every 22,000 vaccinations. Since we've [partially vaccinated almost 220M Americans](#), that's at most 10,000 lives saved as of Oct 10, 2021. But that's assuming the vaccines are as effective against Delta as they are against Alpha. So it's probably much less than 10,000 lives saved.

**Nobody has been able
to attack the data or our
methodology¹**

**Nobody wants to debate
this “on camera”²**

¹So they have to rely on an hominem attacks or dismissals by authorities using hand waving arguments

²[Challenge to the Scientific Community – It's Time for Honest and Open Debate on Vaccine Safety](#)

Even worse...
**COVID vaccines
kill more people
than they save
for all age groups over
a 6 month efficacy
period**

Source: [COVID cost-benefit by age computation](#)

| Age | Killed | Saved | K:S |
|-------|--------|-------|-------|
| 20-30 | 67 | 11 | 6.1:1 |
| 30-40 | 121 | 31 | 3.9:1 |
| 40-50 | 210 | 76 | 2.8:1 |
| 50-60 | 436 | 185 | 2.4:1 |
| 60-70 | 1031 | 450 | 2.3:1 |
| 70-80 | 2140 | 1133 | 1.9:1 |
| 80+ | 6276 | 3458 | 1.8:1 |

Killed>Saved for all ages

The table shows the Killed by vaccine:Saved from COVID death in 6 months numbers. Units for both columns are per million doses.

You can [read this article](#) which details how all these numbers were calculated.

For kids, we kill over 6 kids to save 1 kid from a COVID death. Mandating vaccination for anyone, especially school-age children, is proof of a corrupt society.

Bottom line: It is nonsensical to vaccinate any age group.

3 stopping conditions have already been met

1. # killed > # saved
2. >150K killed
3. >300K permanently disabled

Sources:

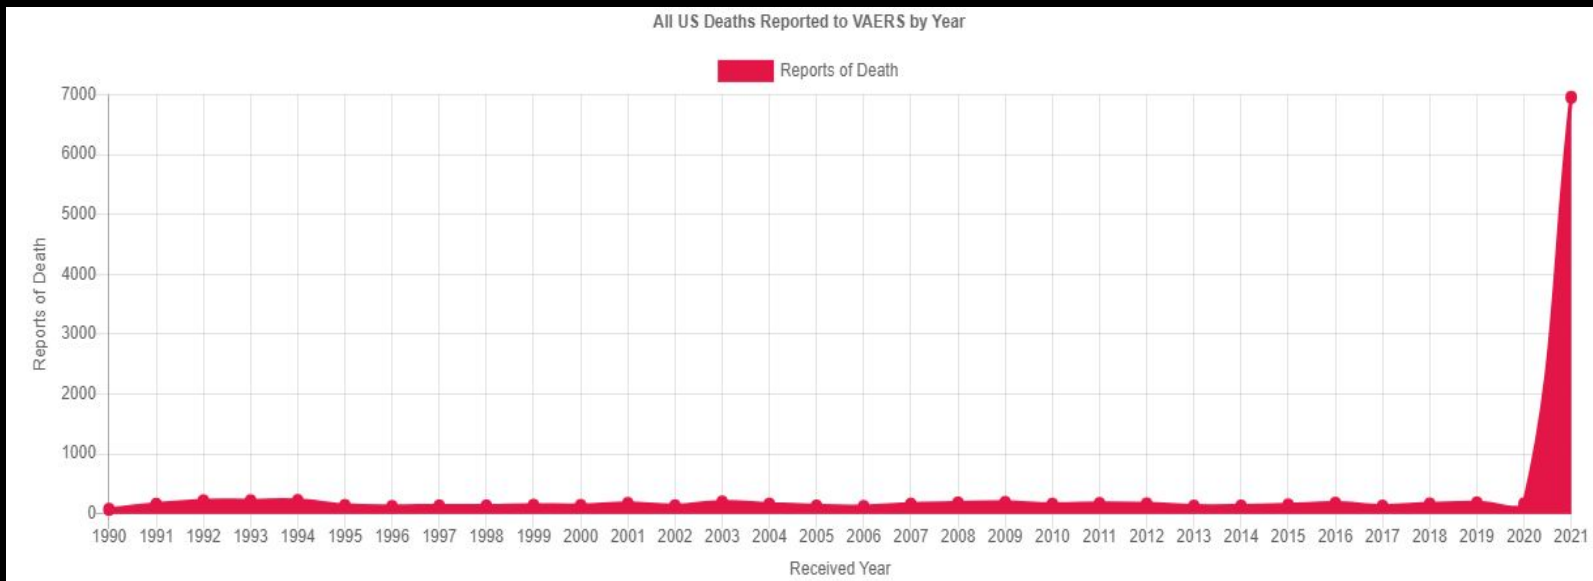

1. [COVID cost-benefit by age computation](#)
2. [Estimating the number of vaccine deaths](#)
3. [OpenVAERS](#) says 8,088 permanently disabled.
[Multiply by under-reporting factor \(URF\) of 41 to get the true number of cases](#)

VISION TEST

Can you spot the unsafe vaccine?

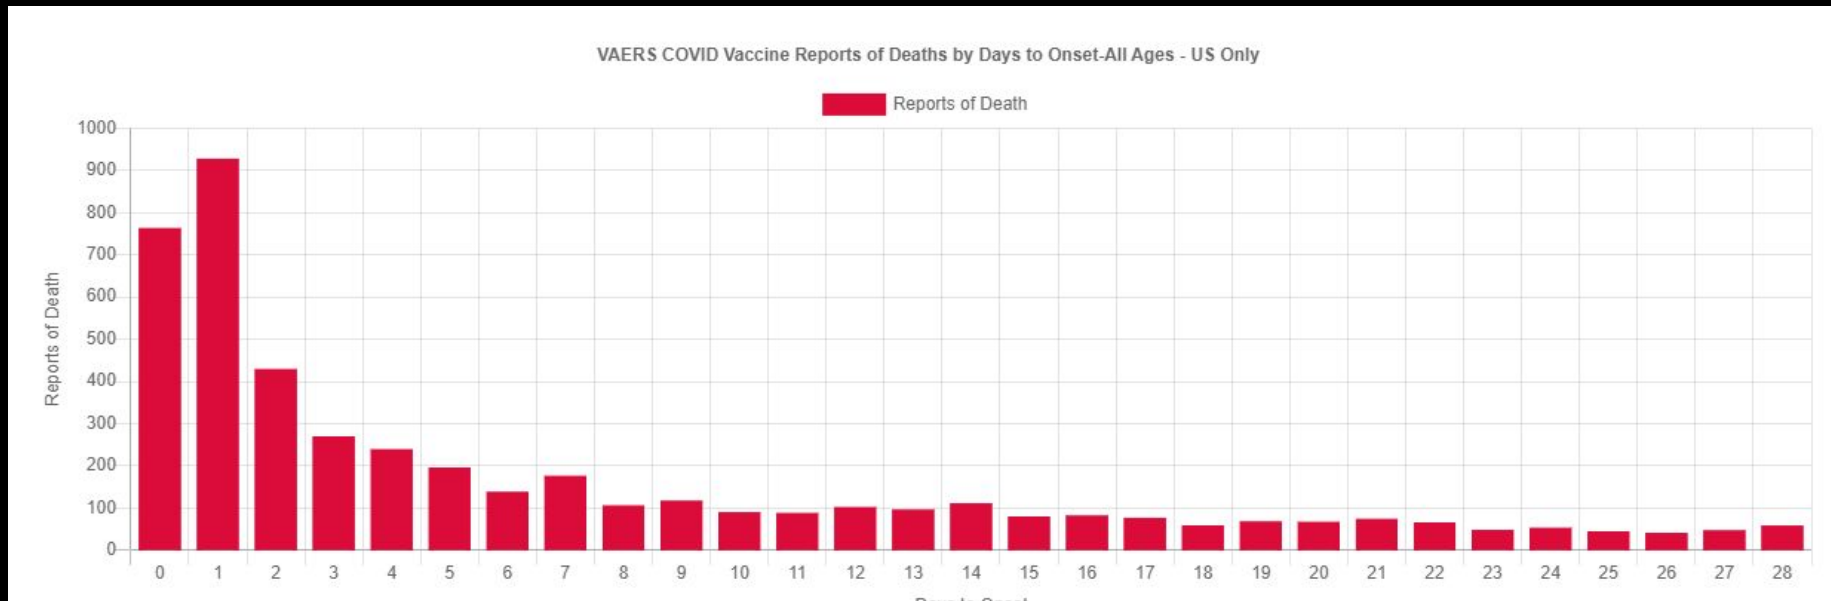

(nobody at the FDA or CDC can, including the advisory committees)

THE FDA SAYS THESE ARE ALL “BACKGROUND DEATHS”

But if they were background deaths, all the bars would be the same height.

Do these look like the same height to you?

And it's all for nothing...

In Israel, the vaccines are making no difference in protecting people from being infected; the core use case.

Claimed benefit: 95%

Actual benefit: ~0%

 Robert W Malone, MD @RWMaloneMD · Sep 2

More on Israel cases. Not really consistent with the story line pushed by legacy media in USA. Not a pandemic of the unvaccinated in Israel.

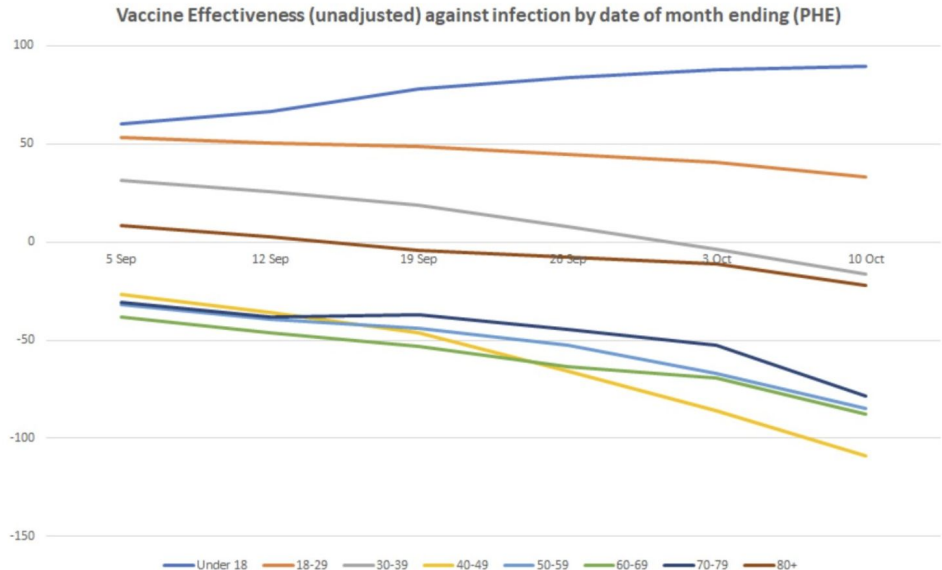

| Age Group | Cases Fully Vaccinated | Cases Unvaccinated | Percent of Cases Fully Vaccinated | Percentage of Population Fully Vaccinated |
|--------------|------------------------|--------------------|-----------------------------------|---|
| 20–29 | 2689 | 795 | 77.2% | 71.9% |
| 30–39 | 3176 | 881 | 78.3% | 77.4% |
| 40–49 | 3303 | 635 | 83.9% | 80.9% |
| 50–59 | 2200 | 359 | 86.0% | 84.4% |
| 60–69 | 2200 | 187 | 92.2% | 86.9% |
| 70–79 | 1384 | 100 | 93.3% | 92.8% |
| 80–89 | 540 | 61 | 89.9% | 91.2% |
| 90+ | 142 | 20 | 87.7% | 89.7% |
| TOTAL | TOTAL | TOTAL | AVERAGE | AVERAGE |
| 20–90+ | 15634 | 3038 | 86.0% | 84.4% |

738 12.8K 21.4K

**UK data shows VE =
-109% for 40 year olds**

**In other words, if you are
40 and you get vaccinated,
you are 2X more likely to
be infected than an
unvaccinated person.**

**Infection Rate in Vaccinated People in Their 40s
Now More Than DOUBLE the Rate in Unvaccinated,
PHE Data Shows, as Vaccine Effectiveness Hits
Minus-109%**

In the latest [Vaccine Surveillance report](#) from [Public Health England](#) (PHE) the infection rate in double-vaccinated people in their 40s went above 100% higher than in the unvaccinated for the first time, reaching 109%. This translates to an unadjusted vaccine effectiveness of minus-109%.

So they changed the story...

“the vaccines help prevent you from being hospitalized if you get infected”

90% of hospital admissions are vaccinated in a region where 50% are vaccinated.

Note: This is a rare US hospital which tracked all-cause admissions by vaccination status. Most hospitals refuse to do this. This was an exception because one person spoke out to make the change.

Reference: [Whistleblower: FDA and CDC Ignore Damning Report that over 90% of a Hospital's Admissions were Vaccinated for Covid-19 and No One Was Reporting This to VAERS](#)

So they changed the story again...

“the vaccines help prevent you from dying if you get infected”

If you are <50, vaccines make you slightly **more likely** to die if you get infected

SARS-CoV-2 variants of concern and variants under investigation

Table 5. Attendance to emergency care and deaths of sequenced and genotyped Delta cases in England by vaccination status (1 February 2021 to 12 September 2021)

| Variant | Age group (years)** | Total | Cases with specimen date in past 28 days | Unlinked | <21 days post dose 1 | ≥21 days post dose 1 | ≥14 days post dose 2 | Un-vaccinated |
|---|---------------------|---------|--|----------|----------------------|----------------------|----------------------|---------------|
| Delta cases | <50 | 497,105 | 119,611 | 49,527 | 30,359 | 83,009 | 85,407 | 248,803 |
| | ≥50 | 95,587 | 35,596 | 7,602 | 314 | 7,129 | 71,991 | 8,551 |

Safety and Efficacy of the BNT162b2 mRNA Covid-19 Vaccine through 6 Months

Stephen J. Thomas, M.D., Edson D. Moreira, Jr., M.D., Nicholas Kitchin, M.D., Judith Absalon, M.D., Alejandra Gurtman, M.D., Stephen Lockhart, D.M., John L. Perez, M.D., Gonzalo Pérez Marc, M.D., Fernando P. Polack, M.D., Cristiano Zerbini, M.D., Ruth Bailey, B.Sc., Kena A. Swanson, Ph.D., et al., for the C4591001 Clinical Trial Group*

September 15, 2021

DOI: 10.1056/NEJMoa2110345

During the blinded, controlled period, 15 BNT162b2 and 14 placebo recipients died; during the open-label period, 3 BNT162b2 and 2 original placebo recipients who received BNT162b2 after unblinding died. None of these deaths were considered related to BNT162b2 by investigators. Causes of death were balanced between BNT162b2 and placebo groups (Table S4).

Pfizer Phase 3: 6 month study result

Shows it killed more people than it saved

| Group | Placebo | Vaccine |
|--------------|---------|---------|
| Pre-unblind | 14 | 15 |
| Post-unblind | 0 | 5 |
| Total | 14 | 20 |

1 person's life was saved by the vaccine, but at an estimated cost of 7 deaths for a net difference of 6 deaths.

Do the math

Pfizer's own study showed that you had to vaccinate 22,000 people to save 1 COVID life.

Even with the a ridiculously conservative VAERS underreporting factor (URF) of 3, and 220M vaccinated and 7,437 deaths in VAERS and 86% of those being causal, that means for every 22,000 people you vaccinate, you kill 1.9 people

So even under extremely conservative assumptions, the vaccines are nonsensical: you are killing 2 people to save 1 person.

Statistical significance of Pfizer's 6 month study

You can make an argument that the Pfizer death benefit numbers were not statistically significant. That's right. They weren't. But **it's the best data we have**. And you can't have it both ways.

If you are claiming the vaccines prevent COVID deaths based on the Pfizer study, then you can't then ignore the fact that the study showed more people were killed than were saved.

Regardless of the statistical significance, the fact that the people who got the placebo had a lower death rate is consistent with the other results we found. Our arguments don't rely on this result; it's just an "interesting" data point.

Statistical significance of Pfizer's 6 month study

And it's important to note that the "death benefit" of 1 person per 22,000 vaccinated is not statistically significant.

The Pfizer data basically showed that any claimed "death benefit" from the vaccine was too small to measure.

All of these

9 INCONVENIENT TRUTHS (1-5)

1. We estimated >150K excess deaths [8 different ways](#) to make it bulletproof
2. Nobody has found an error in [our analyses](#) to date (Sep 28, 2021) that invalidates all 8 ways and shows that the correct number is lower than what we claimed. Experts like [Professor Jeffrey Morris admit they are clueless](#) about # of deaths.
3. Our numbers have been validated in the peer reviewed medical literature (such as the [Kostoff](#) and [Rose](#) papers)
4. The CDC is lying to people that there are no deaths from the vaccines
5. Nobody can show us a more accurate way to estimate the excess death count*

* Most all throw up their hands and say "I don't know." But if they don't know the correct number, how can they claim our analysis is wrong? Answer: They can't. They are being hypocritical.

9 INCONVENIENT TRUTHS (6-9)

6. Nobody from the CDC, FDA, or their respective outside committees (ACIP, VRBPAC) will agree to a public discussion on the matter despite overwhelming public demand for this. They won't even disclose the URF.
7. Masks don't work. The CDC says masks don't work for smoke which is 25X bigger than the virus (50 to 120 nm in size). Cloth masks filter 5% (Fig 3A).
8. Recovered immunity >> vaccine immunity. Makes no sense to vaccinate recovered patient. Why prohibit a naturally immune person from campus?
9. Early treatment protocols are the safer, more effective, smarter alternative to vaccination. They offer up to a 99.76% risk reduction without safety issues.

THE 8 METHODS

1. VAERS excess death analysis
2. Excess CFR analysis
3. Excess death rate analysis
4. Small island study
5. Norway analysis
6. Professional pollster analysis
7. Physician surveys
8. British Airways pilot death statistics
9. Scotland government data

Note: No single method is definitive. But they all support 150,000 deaths or more. Nobody has been able to show that we cherry picked data, made a mistake in the data, or that our methodology was incorrect. We simply used the data and most obvious methods at hand. If there is a more accurate analysis, nobody has brought that to our attention. Instead, they focus on attacking our analysis because it doesn't comport with their belief system. They are not focused on finding the truth.

Over 200K Americans killed by the vaccines so far

The detailed calculations showed background deaths were negligible. Therefore, a good estimate of the number killed is multiplying the actual number in VAERS (6,756 for US-only) by the under-reporting factor (URF) of 41 which is derived here.

$$6,756 * 41 = 276,996 \text{ excess deaths}$$

So if the vaccine didn't cause those excess deaths, then what did? All of the causes of death are consistent with the symptoms that are elevated by the vaccines.

The FDA, CDC, and the drug companies all say there have been no deaths from the vaccine and the only side effect is myopericarditis Someone is lying to you.

**How we know for sure that
the CDC is lying**

Dr. Peter Schirmacher

PRESS CONFERENCE ON MONDAY, 9/20/2021
4PM IN THE LIVE STREAM

**CAUSE OF DEATH AFTER COVID-19
VACCINATION**

**UNDECLARED COMPONENTS OF THE COVID-
19 VACCINES**

20.09.2021 16:00 | [Contact](#)

On Monday, 9/20/2021 in the pathological institute in Reutlingen, the results of the autopsies of eight people who died after COVID19 vaccination will be presented. The fine tissue analyses were performed by pathologists Prof. Dr. Arne Burkhardt and Prof. Dr. Walter Lang. The findings confirm Prof. Dr. Peter Schirmacher's finding that among more than 40 corpses he autopsied who had died within two weeks of COVID19 vaccination, approximately one-third of those deaths were caused by the vaccination. Microscopic details of the tissue changes will be shown during the live-streamed press conference. Prof. Dr. Werner Bergholz will report on the current parameters of the statistical recording of vaccination events.

Schirmacher validated

"The fine tissue analyses were performed by pathologists Prof. Dr. Arne Burkhardt and Prof. Dr. Walter Lang. The findings confirm Prof. Dr. Peter Schirmacher's finding that among more than 40 corpses he autopsied who had died within two weeks of COVID19 vaccination, approximately one-third of those deaths were caused by the vaccination."

In this study, 70% of deaths probable to very likely caused by vaccine.

Someone is lying to you and it isn't the Germans.

Highlights

- Bulk of COVID-19 per capita deaths occur in elderly with high comorbidities.
- Per capita COVID-19 deaths are negligible in children.
- Clinical trials for these inoculations were very short-term.
- Clinical trials did not address long-term effects most relevant to children.
- High post-inoculation deaths reported in VAERS (very short-term).

Thus, the ratio of E_{SAE} to O_{SAE} is 31 to 1, suggesting a URF of 31

$$(N_{SAE_Pfizer_trial} / N_{SAE_Pfizer_VAERS} = \sim 1.4M / 43,948).$$

Using this URF for all VAERS-classified SAEs, estimates to date are as follows: **205,809 dead**, 818,462 hospitalizations, 1,830,891 ER visits, 230,113 life-threatening events, **212,691 disabled** and 7,998 birth defects to date [38].

Since the URF for MAEs is very likely larger than for SAEs, it is satisfactory to assume that 31 is a humble estimate URF for all AEs (refer to Supplementary Table 2). ”

Critical Appraisal of VAERS Pharmacovigilance: Is the U.S. Vaccine Adverse Events Reporting System (VAERS) a Functioning Pharmacovigilance System?

Jessica Rose, PhD, MSc, BSc
The Institute for Pure and Applied Knowledge

“Patterns of adverse events, or an unusually high number of adverse events reported after a particular vaccine, are called ‘signals.’ If a signal is identified through VAERS, scientist[s] may conduct further studies to find out if the signal represents an actual risk.”

CDC on Vaccine Safety

Abstract

Following the initiation of the global rollout and administration of the COVID-19 vaccines^{1,2} on December 17, 2020, in the United States, hundreds of thousands of individuals have reported Adverse Events (AEs) using the Vaccine Adverse Events Reporting System (VAERS). To date, approximately 50% of the population of the United States have received 2 doses of the COVID-19 products with 427,831 AEs reported into VAERS as of August 7th, 2021.

Pharmacovigilance (PV) is the process of collecting, monitoring, and evaluating AEs for safety signals to reduce harm to the public in the context of pharmaceutical and biological agents. Many of the issues with VAERS are becoming well known – especially with regards to reporting and recording of data – in light of the extensive use of this system this year, challenging its functionality as a pharmacovigilance system.

This appraisal assesses three issues that respond to the question of VAERS pharmacovigilance by analyzing VAERS data: 1. Deleted reports, 2. delayed entry of reports and 3. recoding of Medical Dictionary for Regulatory Activities (MedDRA) terms from severe to mild. The most recently updated publicly available VAERS dataset was found to have N=1516 (0.4%) VAERS IDs removed (“missing”).

- 1 The Brand Name: Pfizer-BioNTech COVID-19 Vaccine, the Previous Name: BNT162b2 or the Company Name: Pfizer Inc. and BioNTech SE. can be used in the case of the Pfizer/BioNTech COVID-19 products. The Brand Name: mRNA-1273 and/or Company Name: Moderna, Inc. can be used in the case of the Moderna COVID-19 products.
- 2 mRNA biologicals are not true vaccines. True vaccines undergo time-dependent testing protocols to ensure safety and efficacy, typically enduring between 10 and 15 years. True vaccines are a preparation of a weakened or killed pathogen, such as a bacterium or virus, or of a portion of the pathogen’s structure that, upon administration to an individual, stimulates antibody production or cellular immunity against the pathogen but is incapable of causing severe infection. The mRNA biologicals do not satisfy either these requirements and as such are more akin to experimental treatments than vaccines.

“Results prove that none of the vaccines provide a health benefit and all pivotal trials show a statically significant increase in “all cause severe morbidity” in the vaccinated group compared to the placebo group.

Based on this data it is all but a certainty that mass COVID-19 immunization is hurting the health of the population in general.

Scientific principles dictate that the **mass immunization with COVID-19 vaccines must be halted immediately ...**”

Citation: Classen B. US COVID-19 Vaccines Proven to Cause More Harm than Good Based on Pivotal Clinical Trial Data Analyzed Using the Proper Scientific Endpoint, “All Cause Severe Morbidity”. Trends Int Med. 2021; 1(1): 1-6.

ABSTRACT

Three COVID-19 vaccines in the US have been released for sale by the FDA under Emergency Use Authorization (EUA) based on a clinical trial design employing a surrogate primary endpoint for health, severe infections with COVID-19. This clinical trial design has been proven dangerously misleading. Many fields of medicine, oncology for example, have abandoned the use of disease specific endpoints for the primary endpoint of pivotal clinical trials (cancer deaths for example) and have adopted “all cause mortality or morbidity” as the proper scientific endpoint of a clinical trial. Pivotal clinical trial data from the 3 marketed COVID-19 vaccines was reanalyzed using “all cause severe morbidity”, a scientific measure of health, as the primary endpoint. “All cause severe morbidity” in the treatment group and control group was calculated by adding all severe events reported in the clinical trials. Severe events included both severe infections with COVID-19 and all other severe adverse events in the treatment arm and control arm respectively. This analysis gives reduction in severe COVID-19 infections the same weight as adverse events of equivalent severity. Results prove that none of the vaccines provide a health benefit and all pivotal trials show a statically significant increase in “all cause severe morbidity” in the vaccinated group compared to the placebo group. The Moderna immunized group suffered 3,042 more severe events than the control group ($p=0.00001$). The Pfizer data was grossly incomplete but data provided showed the vaccination group suffered 90 more severe events than the control group ($p=0.000014$), when only including “unsolicited” adverse events. The Janssen immunized group suffered 264 more severe events than the control group ($p=0.00001$). These findings contrast the manufacturers’ inappropriate surrogate endpoints: Janssen claims that their vaccine prevents 6 cases of severe COVID-19 requiring medical attention out of 19,630 immunized; Pfizer claims their vaccine prevents 8 cases of severe COVID-19 out of 21,720 immunized; Moderna claims its vaccine prevents 30 cases of severe COVID-19 out of 15,210 immunized. Based on this data it is all but a certainty that mass COVID-19 immunization is hurting the health of the population in general. Scientific principles dictate that the mass immunization with COVID-19 vaccines must be halted immediately because we face a looming vaccine induced public health catastrophe.

Keywords

Clinical trial, Vaccines, COVID-19.

Introduction

For decades, true scientists have warned that pivotal clinical trial designs for vaccines are dangerously flawed and outdated

[1]. Vaccines have been promoted and widely utilized under the false claim they have been shown to improve health. However, this claim is only a philosophical argument and not science based.

In a true scientific fashion to show a health benefit one would need to show fewer overall deaths during an extended period in the vaccinated group compared to a control group. Less stringent

More validation

Have you ever wondered why the death rate skyrockets whenever the vaccines are rolled out? It isn't COVID. Could it be the vaccine??

cherryhills, 1 week ago

I did an analysis of random countries that had little to no incidence of covid cases for more than a year after the initial known outbreak in late 2019. In every case, the death rate skyrocketed within a few weeks of the vaccine rollout. Charts here:

Both the team and the NBA tried to cover up Goodwin's story so nobody would find

Chuck Callesto  @ChuckCallesto · Oct 14

BREAKING REPORT: Hawks NBA Star Brandon Goodwin Reports Blood Clots From COVID Vaccine Ended His Season – NBA Told Him to Keep It Quiet..

In the midst of the fallout between the NBA and Kyrie Irving, a former Atlanta Hawks point guard has now sounded the alarm on how the vaccine ultimately ended his season last year, and how his team attempted to cover up the side effects he suffered from the shot.

Source: [ATL Hawks Point Guard: 'Yes, The Vaccine Ended My Season. One Thousand Percent'](#)

**Teen deaths up 47% since
the jab rolled out.**

**Jab deaths are 10X higher
than COVID deaths.**

Think about it...

Steve Kirsch ✓ @stkirsch

Teen deaths more than double in UK

Teen deaths up to 125% higher than the 5-year-average since they started to be given the Covid-19 Vaccine according to official ONS data

BY THE EXPOSÉ ON OCTOBER 13, 2021 • (LEAVE A COMMENT)

Listen Now

An investigation of official ONS data has revealed that since the Covid-19 vaccine was offered and administered to teenagers in England and Wales there has been a significant rise in deaths among teens against the five-year-average with some weeks seeing an increase as high as 125%.

For children 12 to 15 years of age, the extremely short and small Pfizer Covid-19 vaccine clinical trial found the overall incidence of severe adverse events which left the children unable to perform daily activities, during the two-month observation period to be 10.7%, or 1 in 9, in the vaccinated group and 1.9% in the unvaccinated group.

In the UK, the vaccines are making things worse

Male teen deaths are up 63%

COVID deaths 12X higher

81% of deaths from vaccinated, but only 67% fully vaccinated

New post on **The Expose**

The UK has Fallen – 81% of Covid-19 deaths are among the Vaccinated, Male Teen Deaths have risen by 63% since they were offered the jab, Covid-19 Deaths are 12 times higher than this time last year...

by [Daily Expose](#)

In the UK, the Medical Regulator admits that these vaccines are **4X more deadly** than all vaccines combined over the last 20 years!

Source: [UK Medicine Regulator confirms there have been four times as many deaths due to the Covid-19 Vaccines in 8 months than deaths due to all other Vaccines combined in 20 years](#)

All cause mortality is up in Vermont.

It isn't COVID.

They are the most vaccinated US state.

I wonder what is causing all the deaths? Hmmm...

Covid19Crusher @Covid19Crusher · 6h
Vermont is the most vaccinated US state.

It is not doing too well on the all-cause mortality front.

37

528

989

Covid19Crusher @Covid19Crusher · 2h
In my view, the interesting question is:

official Covid deaths account only for 17% of the surge in fatalities since its beginning on week 28,

so what is suddenly killing Vermonters?

Replying to [@stkirsch](#)

The CDC is conveniently trying to hide vaccine-induced mortality data.
Taiwan is not.

Anabel V. @Anabel_Villeroy · 49m

More die after  in Taiwan than from C19 itself.

Looks like Taiwan is recording vaccine deaths properly – unlike the US
where you are not considered vaccinated until 14 days post-inoculation.

A convenient way for the CDC to hide vaccine-induced mortality data.

Fact checkers delight in saying VAERS can't be used for pharmacovigilance

The [scientific literature](#) says otherwise.

Just because the [CDC says something about VAERS](#) doesn't mean it is true. That's a huge mistake that has cost hundreds of thousands of lives.

FDA says this is just over-reporting. That's untrue. They provided no evidence of that, just hand waving. All the [evidence shows they are lying](#).

We use the [five Bradford-Hill criteria to establish causality](#). And we did the death calculations 8 different ways using 8 different data sources (including government data from 35% of the world's population) and got the same results. So we didn't rely on VAERS. That was just one method.

None of the fact checkers would ever dare to debate me in public. They hide in the shadows while people die.

If Vaccine Adverse Events Tracking Systems Do Not Support Causal Inference, then “Pharmacovigilance” Does Not Exist

James Lyons-Weiler, PhD
Editor-in-Chief

There are two messages from those who hold appointed offices or other influential positions in Public Health on long-term vaccine safety. The first message is that long-term randomized double-blinded placebo-controlled clinical trials are not necessary for the long-term study of vaccine safety because we have “pharmacovigilance”; i.e. long-term post-market safety surveillance that is supported by widely accessible, passive vaccine adverse events tracking systems.

The second message is that any use of those very same vaccine adverse events tracking systems that leads to the inference or conclusion that vaccines

using science is to pose a hypothesis and think of the most critical test that could, in principle, falsify (i.e. disprove) the hypothesis of interest if that hypothesis was, in fact, false.

After conducting the critical test of the hypothesis of interest, a scientist should then examine the evidence provided by the test and interpret the hypothesis and the background knowledge about the hypothesis in light of the new evidence from the critical test that could have demolished the hypothesis if it was, in fact, false.

Under the Popperian model of science,

COVID-19 (Stand 07.09.2021)

Sehr geehrte, liebe Kolleginnen und Kollegen,

kurz eine sehr **wichtige Info** zum Impfgeschehen!

In Oberhausen hat es nach Durchführung von 90 Auffrischungsimpfungen in einem ASB Haus zahlreiche schwere Komplikationen, davon ein Todesfall und 2 Reanimationen gegeben.

Insgesamt sind von 90 Impfungen 9 heftig erkrankt, überwiegend mit kardiopulmonalen Problemen. Entsprechende Meldungen an das Paul-Ehrlich-Institut, das Gesundheitsamt und die KVNO sind erfolgt, die notwendigen Untersuchungen laufen.

Wir müssen Sie zeitnah über die Vorkommnisse informieren, zumal weder eine arzneimittelrechtliche Zulassung durch die EMA noch eine STIKO Empfehlung für diese Auffrischungsimpfungen derzeit existieren!

Ich möchte Sie herzlich bitten, selber ärztlich zu entscheiden, ob Sie nicht lieber auf die Zulassung oder Empfehlung warten wollen, oder Sie diese Auffrischungsimpfung tatsächlich für so dringlich halten, dass diese auch ohne Empfehlung der STIKO oder CoronaImpfV-konforme Zulassung durchgeführt werden müsste.

Wir halten Sie natürlich auf dem Laufenden.

Mit herzlichen Grüßen

Ihre

Nursing home: too deadly

4 dead/7 hospitalized after Pfizer Booster
Potential benefit: Save <1 life from COVID

Death:Life = 4:1

Assumptions:

1. 3% IFR for elderly and 30% get COVID in a year
2. Booster lasts for 6 months

Sunnycrest nursing home
Whitby, Ontario, Canada
136 beds

Oahu nursing homes

Hale Nai = 288 and Avalon = 108 residents

They lost over 8% of their residents from the vaccine and < 2% from COVID (**V:C=4:1**).

The whistleblower, Abrien Aguirre, was fired for disclosing this.

Here's his [original interview](#) and [my extended interview](#).

Here is a [discussion of patients are dying from the vaccine and not COVID](#).

ABRIEN AGUIRRE HAWAII COVID WHISTLEBLOWER

WATCH

Abrien Aguirre

UK funeral director John O'Looney: Deaths skyrocketed 250% after vaccination started

If you are short on time, start watching at 15:00 for just two minutes. "The death rate was extraordinary. I've never seen anything like it in 15 years as a funeral director and neither has anyone I've spoken to. And it began as soon as they started putting needles in arms." Massive number of deaths of all ages and all locations started when they rolled out the vaccines. They were all covered up as "COVID deaths."

Death rate skyrocketed by 250% in elderly after vaccines rolled out.

3-5 bodies a week in a single nursing home in a week.

Death rates only went up after vaccinations started.

Note: we were able to confirm this in the US, but nobody wanted their name used publicly.

John O'Looney

How do you explain these anecdotes?

They are consistent with what the UK funeral director observed. If it wasn't the vaccines, what is causing all these emergencies which never happened with COVID?

My friend who lives in Florida in a 55 and older community said this " I saw next to no ambulances or emergency vehicles in here between March and December... When people started getting the jabs in December January February March it was non-stop with ambulances emergency vehicles in the community"

People dying at 4X
normal rate.

They are dying soon
after vaccination.

Mailvox: Dying Suddenly

An electrician reports that an alarmingly high number of the members of his union are dying, more than 4x the annual average.

Reading what you posted about a pilot dying in flight and many other coincidences brought to mind the seemingly high number of general & corporate aviation crashes recently.

Anecdotally, my electricians local union typically sees eight members pass per year; that average has held for the last 14 years. In 2020, four members passed. So far, in 2021, 33 members have passed, one additional age 63, since a business agent of the local told me this:

"So here's some more info about what we talked about. As of the end of September we have lost 32 members. Only 4 were in their 70s and appear to have died of natural causes or self-inflicted abuse. All 4 were allegedly not-vaxxed. 2 members in their 60s passed, both apparently were vaxxed, 1 died of cancer, the other of a heart attack, but had 2 previous heart attacks. The remaining 26 were allegedly all vaxxed at a union sponsored event. All 26 were still working & between 31 & 68 years old. 13 died within 10-12 days of a vax. For the ones I got an answer, the deaths were heart attacks or strokes. About 8, the balance, said they didn't know. Many "died suddenly". A term I am hearing a lot. The remaining 13 died at various times after vax but 9 of the obits say "died suddenly" or "died unexpectedly"

"The families of 4 of the men, men we both know, demanded autopsies after being refused by a hospital. These 4 hired private autopsies and I'm told massive blood clotting was found in various organs. 2 reports stated "I have never seen these type of conditions/injuries".

The agent further told me that they are all in shock and don't know what to do. They're frozen.

Remember, it's safe and effective. *Highly* safe and effective. Except when it kills people. Then, perhaps not so much.

UPDATE: He's not the only one seeing others have "died suddenly" for no reason at all.

The anecdotes match what the research finds

Everything is consistent: more vaccination →
more deaths.

Dear all,

Please mark your calendars for a special open science session with
Professor [Theo Schetters](#) on **November 2nd, 2021.**

Title of his presentation: **A PERIOD OF TRANSIENT INCREASE IN ALL-
CAUSE MORTALITY AMONG 65-80 YEAR OLD POPULATION IN THE
NETHERLANDS COINCIDES WITH VACCINATION CAMPAIGN AGAINST
SARS-CoV-2**

Prof. Schetters is looking to share his findings and discuss them with
scientists who have done some analysis on the COVID-19 vaccines.
I hope you can all join us for this session.

V:C = 2:1 to 7:1 in Pfizer's own trial

The trial had just 2 COVID deaths in placebo group and 1 in the treatment group. Therefore there was only 1 COVID death saved. Overall there were 15 deaths in the treatment group; 14 in the placebo group.

Bottom Line: We killed 2 to save 1, leading to a net loss of 1 life.

Considering both phases, we killed 7 people to save 1 COVID life (net difference of $20-14=6$), so V:C=7:1.

Note: The numbers in Pfizer's study are not statistically significant because the study was never powered to show a death benefit. So this is not conclusive. It is just "interesting."

Vaccination is nonsensical

Vaccines, mandates, and boosters are all nonsensical. We have $> 2:1$ V:C ratio, but need at least $1:10$ to be viable.

If we want to end the pandemic and get back to normal, we should copy what Uttar Pradesh did.

They didn't rely on vaccination at all.

They used early treatment.

If we don't want to end the pandemic, we should keep mandating vaccination over and over again, just like Israel.

Vaccinating kids, pregnant women, and those who have already had COVID is even worse

Our society today is driven by a single goal:
vaccinate everyone alive, whether they need it or not.

Clinical trial fraud

Inconvenient truth: Pfizer isn't trustworthy...

1. Pfizer's own [6 month study showed that you were more likely to die](#) if you got the vaccine (see page 33).
2. The age 12-15 trial was way too small to show effectiveness or safety. With just 1,129 kids, it had one permanent paralysis that was never reported to the FDA (Maddie de Garay). Today, nobody has been warned about this and there was no investigation by the FDA. **Nobody has officially acknowledged it ever happened. They ignore it.**
3. [Pfizer paid one of the largest criminal fines ever imposed on a drug company](#) for the arthritis drug Bextra.
4. The [Pfizer consent form](#) allows for participants who need emergency care and go straight to their doctor or hospital to be ejected from the study.
5. Pfizer Phase 3 participants had 8 to 10X lower health risks (diabetes, cardiac arrest) as we showed [here](#). There were a LOT of exclusions that enabled them to recruit such a healthy cohort. 110 people should have died in the placebo group. Only 14 did.
6. Causes of death were higher in the vaccine group, e.g., 4X higher rate of cardiac arrest.
7. Participants found it extremely hard to report adverse events (there were messages in the Facebook group about this but Facebook removed the evidence so nobody would know)
8. Five times (5X) higher drop off in the treatment arm than in the control arm (see next slide note the **311 vs. 61** in the last two rows); that's statistically impossible. Nobody asked about it.
9. The company is incompetent. They can't seem to find any safety signals even though obvious in VAERS ([The adverse event table shows that the vaccines adversely impact every organ in the body](#)). **Pfizer still can't figure out if anyone has died.**
10. No autopsies to determine cause of death were done in the treatment group. That's really odd especially when a top pathologist (one of the top 100 pathologists in the world) says at least 30% of deaths within 2 weeks after vaccination were caused by the vaccine. Why weren't autopsies done on the people who died after being vaccinated? **Answer: They don't want anyone to know what they died from.**
11. **They cut the trial short at 6 months. NO MORE CONTROL GROUP. We'll never know the long-term effects like vaccine-enhanced infectivity and replication, prion diseases, linked-epitope suppression, autoimmune diseases, cancers, ...**

Why didn't anyone ask any questions about the gaming in the Phase 3 trial?!? **This is very unlikely to happen by chance ($p < 0.00001$).**

Pfizer-BioNTech COVID-19 Vaccine
VRBPAC Briefing Document

Table 2. Efficacy Populations, Treatment Groups as Randomized

| | BNT162b2 (30 µg) n ^a (%) | Placebo n ^a (%) | Total n ^a (%) |
|--|---|-------------------------------|-----------------------------|
| Randomized ^b | 21823 (100.0) | 21828 (100.0) | 43651 (100.0) |
| Participants excluded from evaluable efficacy (14 days) population | 1790 (8.2) | 1585 (7.3) | 3375 (7.7) |
| Reason for exclusion ^c | | | |
| Randomized but did not meet all eligibility criteria | 36 (0.2) | 26 (0.1) | 62 (0.1) |
| Did not provide informed consent | 1 (0.0) | 0 | 1 (0.0) |
| Did not receive all vaccinations as randomized or did not receive Dose 2 within the predefined window (19- 42 days after Dose 1) | 1550 (7.1) | 1561 (7.2) | 3111 (7.1) |
| Had other important protocol deviations on or prior to 7 days after Dose 2 | 311 (1.4) | 60 (0.3) | 371 (0.8) |
| Had other important protocol deviations on or prior to 14 days after Dose 2 | 311 (1.4) | 61 (0.3) | 372 (0.9) |

^an = Number of participants with the specified characteristic.

^bThese values are the denominators for the percentage calculations.

^cParticipants may have been excluded for more than 1 reason.

Note: 100 participants 12 through 15 years of age with limited follow-up are included in the randomized population (49 in the vaccine

Why hasn't the FDA investigated the Maddie de Garay clinical trial fraud?

1. She was in the [Pfizer Phase 3 12-15 year old trial](#)
2. She was 1 of just 1,131 kids in treatment arm
3. She was paralyzed less than 24 hours after her second Pfizer shot.
4. Pfizer reported her case as “abdominal pain” rather than “permanent paralysis” so they would get approved.
5. Today, she has no feeling below her waist, she can't hold her head up on her own, she has to eat through a feeding tube.
6. It isn't clear she will improve over time.
7. Physicians don't know how to treat her.
8. She was never ejected from the trial.
9. FDA Commissioner Janet Woodcock promised an investigation, but the parents have never been contacted by the FDA or CDC as promised.
10. She has received \$0 in compensation. **ZERO.**
11. Maddie has been banned from social media platforms for violating their guidelines so she can't share her story.

Don't worry. There are no
conflicts of interest.

Nothing to see here.

**What the vaccines do to our
bodies is unprecedented**

How mRNA vaccines work

Problems

1. mRNA goes **everywhere**
2. Spike is toxic
3. Amount, distribution, duration of spike is person dependent (depends on degradation of dose too)
4. NHP studies never done
5. Pregnancy studies never done
6. Original antigenic sin
7. Vaccine enhanced infectivity/replication (ADE superset)

CDC says spike protein is “harmless”

A Closer Look at How COVID-19 mRNA Vaccines Work

COVID-19 mRNA vaccines give instructions for our cells to make a harmless piece of what is called the “spike protein.” The spike protein is found on the surface of the virus that causes COVID-19.

1. **First**, COVID-19 mRNA vaccines are given in the upper arm muscle. Once the instructions (mRNA) are inside the muscle cells, the cells use them to make the protein piece. After the protein piece is made, the cell breaks down the instructions and gets rid of them.
2. **Next**, the cell displays the protein piece on its surface. Our immune systems recognize that the protein doesn't belong there and begin building an immune response and making antibodies, like what happens in natural infection against COVID-19.

But the scientific literature says they are lying; they say they spike protein is cytotoxic

1. [Be aware of SARS-CoV-2 spike protein: There is more than meets the eye](#)
2. [Toxicological insights of Spike fragments SARS-CoV-2 by exposure environment: A threat to aquatic health?](#)
3. [SARS-CoV-2 Spike Protein Impairs Endothelial Function via Downregulation of ACE 2](#)
4. [Pay no attention to the spike proteins behind the curtain](#)
5. [Clearing up misinformation about the spike protein and COVID vaccines](#)

Adverse event table

This is a partial list of adverse events. Here is [a more complete list](#).

Nearly every event was elevated.

[Jessica Rose found over 10,000 event types](#).

No vaccine in history has this range of adverse events. It is unprecedented.

Note that the elevation of risk is often temporary, e.g., for cardiac arrest. This table only compares the number of events reported this year vs. previous years.

Example: Cardiac arrest was reported 71X more often than normal, but that risk is only elevated for an unknown amount of time.

For example, troponin levels only stay elevated (up to levels >10X that of heart attack levels) for a few months. D-dimer, troponin, and spike protein can be elevated for months after vaccination. This is not normal.

Dr. Peter McCullough would be delighted to talk to the press about actual patients, but the press isn't interested in reporting on this.

| Symptom | X factor |
|-----------------------------|----------|
| Pulmonary embolism | 473 |
| Stroke | 326 |
| Deep vein thrombosis | 264.3 |
| Thrombosis | 250.5 |
| Fibrin D dimer increased | 220.8 |
| Appendicitis | 145.5 |
| Tinnitus | 97.3 |
| Cardiac arrest | 71 |
| Death | 58.1 |
| Parkinson's disease | 55 |
| Slow speech | 54.3 |
| Aphasia (inability to talk) | 52.3 |

Full list: [Estimating the number of COVID vaccine deaths in America](#)

Cardiac arrest example

71X elevated vs. baseline

(avg over 5 years for all vaccines; $57/4 \times 5 = 71$)

Note: The 71X elevation is in a period shortly after vaccination and not the entire year!

Autoimmune disease marker extremely elevated (5,000 times normal)

AngiD
@AngiD

Sep 29, 2021 6:24 AM

Steve i have msg you in twitter about my neurology pt with side effects. I thank you so much for your response. We have seen several rare autoimmune diseases in the elderly recently just show up. All have been vaccinated second dose in March/February. GAD 65 labs at 25000 norms are 0-5. Any way I lost my job Monday for refusing to comply with the governors executive order. I would love to help get the word out about the vaccines. If you are looking for an RN to help let me know please. a [redacted]@gmail.com

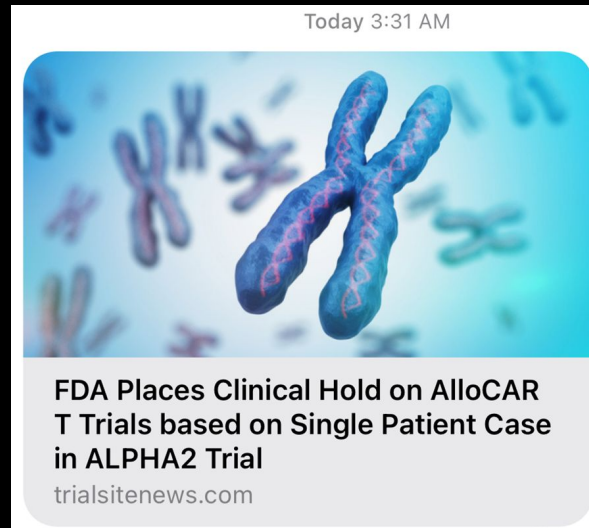

How can D-dimer be elevated for months after vaccination?!?

1. D-dimer is lagging indicator of blood clots.
2. [Hoffe](#): >60% have elevated D-dimer
3. Other doctors have confirmed these results
4. The elevation (e.g. levels @1500) can persist for 3 months.

Sadly, none of this matters

**Because nobody at the CDC
or FDA cares**

In all other cases, we halt the trial at the first sign of something amiss in just one patient

Ex-CDC head recalls '76 swine flu outbreak

Story Highlights

In 1976, officials responded with vaccination that killed more people than the flu
It cost Dr. David Sencer his job as Centers for Disease Control director
Sencer says officials "believed that we were doing the right thing"

[Next Article in Health »](#)

From Abbie Boudreau and Scott Zamost
CNN Special Investigations Unit

TEXT SIZE

ATLANTA, Georgia (CNN) -- The man who led the response to the 1976 swine flu outbreak is more deaths than the disease, but says he's sorry for the people killed or sickened.

Dr. David Sencer says with today's knowledge, officials' 1976 recommendations would have been

Federal officials urged widespread vaccinations after swine flu broke out among soldiers at Fort Dix, New Jersey, killing one of the 14 diagnosed with the illness. But the program was suspended after at least 25 people died from vaccine reactions. About 500 others later suffered from Guillain-Barre syndrome, which damages nerves and can lead to paralysis.

The results cost Dr. David Sencer his job as director of the Centers for Disease Control and Prevention. Now 84 and retired, he said this week that health officials "acted on the best knowledge that we had at the time."

In 1976, we halted the Swine Flu vaccine nationwide after just 32 deaths

Federal officials urged widespread vaccinations after swine flu broke out among soldiers at Fort Dix, New Jersey, killing one of the 14 diagnosed with the illness. But the program was suspended after at least 25 people died from vaccine reactions. Other estimates put the death toll at **32 people**, while about 500 others later suffered from Guillain-Barre syndrome, which damages nerves and can lead to paralysis.

- [CNN](#)

But for COVID vaccines,
the collateral damage doesn't matter.

They don't care how many people we kill or disable. It's not even measured.

As of Oct 13, 2021, the FDA and CDC don't know the URF. If they cared, that would be the very first thing they'd compute since it is required for risk/benefit analysis. It's easy to do. It took me less than an hour. Instead, they act as if the URF=1 without evidence.

And there isn't even a category for "COVID Vaccine Deaths."

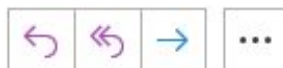

The bottom line is this: As far as I know, none of the people who work at the CDC or FDA give a shit about how many people they kill with the vaccines. No one. Period. Full stop.

Re: wow. the FDA admits it has no idea of the URF !!!

Hi Steve,

How can the FDA not have some kind of estimate for the URF at this late stage of the declared pandemic?!? How have at least five international groups (incl. yours) done this and come up with #s in the same reasonable ballpark and they don't have this info. on-hand?!? ...despicable and embarrassing. Surprisingly, I have seen some people on the other side of the narrative trying to publish papers on the basis that the VAERS has captured 100% of the problems! The FDA needs to provide some leadership in this area.

Sincerely,
Byram

Politicians' motivations are being exposed

SHOCKING Allegation: Australia's Gladys Berejiklian was Blackmailed by Big Pharma to Impose Covid-19 Vaccine Mandate

BY CAPTAINDARETOFLY ON OCTOBER 12, 2021 • (15 COMMENTS)

Listen Now

The Covid-19 “pandemic” has gone beyond protecting the people from the virus – governments impose tyrannical restrictions in the spirit of “health” to control and manipulate the masses. Corrupt politicians and big pharma are working to profit from the suffering of citizens, forcing vaccine mandates and ineffective measures to keep them sick and fearful.

However, some of these shameless profiteers, including Gladys Berejiklian of New South Wales (NSW), Australia, are finally getting exposed for their crimes.

Source: [Whistleblower: FDA and CDC ignore reports of serious Covid-19 vaccine injuries from highly credentialed pro-vaccine ICU physician](https://aaronsiri.substack.com/p/whistleblower-fda-and-cdc-ignore)

"This highly trained physician, trusted to care for patients for over two decades, including at Georgetown and Harvard University affiliated hospitals, penned a detailed letter to the FDA and the CDC describing these harms.

Risking her career and more, she thought long and hard before finally emailing her letter to FDA and CDC officials. She then held her breath ... but, alas, over a week passed with no response – not even an acknowledgement. She then turned to our firm and within hours of sending a legal letter, the FDA responded to the doctor. Sadly, the response was not about public health. It was about public relations." -Aaron

September 28, 2021

Dear Dr. Marks and Dr. Shimabukuro,

As a physician, I am compelled by conscience to write this letter. I am fully vaccinated for Covid-19, but my experience this year treating patients in a busy ICU does not comport with claims made by federal health authorities regarding the safety of Covid-19 vaccines.

I am a licensed physician practicing in the state of California. I obtained my medical degree from University of Southern California and received my post-graduate training at Georgetown University and Harvard-affiliated hospitals. I have been a doctor for more than twenty years and I have never witnessed so many vaccine-related injuries until this year. As a fully vaccinated physician, I feel pained in admitting this. But I am compelled by conscience to state the facts as I observe them on the frontlines.

The following are a few illustrative examples of Covid-19 vaccine related injuries I have observed firsthand. While causation is difficult to prove definitively, it is my clinical judgment that each of these injuries were caused by a Covid-19 vaccine, because there was no other plausible explanation for these injuries other than the fact that the patients had recently been vaccinated. I had a direct doctor-patient relationship for each of the patient accounts below and have removed all personal identifiable information. To further assure patient anonymity, certain medical but inconsequential details have been withheld or changed to ensure the absence of any PII.

1. An otherwise healthy patient under age 40 developed low back pain and had an episode of urinary incontinence after receiving a Covid-19 vaccine. The day after the second dose, the patient felt numbness and tingling down one leg. The symptoms rapidly progressed such that a few days later, patient was admitted to the hospital for bilateral leg paralysis. MRI showed transverse myelitis. Weekly follow-up imaging showed that the process continued to worsen and ascend, despite maximal medical therapy. Eventually patient became quadriplegic, blind and had a tracheostomy placed. Patient developed autonomic dysfunction (irregular heart rate and hypotension) and became cognitively impaired.
2. A generally healthy patient in the early seventies, with no smoking history or prior lung disease, received a Covid-19 vaccine and developed generalized malaise with a poor appetite and a new cough. According to the spouse, patient lost >15 lbs during this time period. The cough worsened over the course of the next month and the patient was hospitalized. CT scan of the chest showed bilateral diffuse ground-glass opacities, typical of COVID pneumonia. However, patient was

Senior Army flight surgeon warns pilots could die in mid-flight from vaccine side effects

Source: [AFFIDAVIT OF LTC. THERESA LONG MD IN SUPPORT OF A MOTION FOR A PRELIMINARY INJUNCTION ORDER – Deep Capture](#)

36. I personally observed the most physically fit female Soldier I have seen in over 20 years in the Army, go from Collegiate level athlete training for Ranger School, to being physically debilitated with cardiac problems, newly diagnosed pituitary brain tumor, thyroid dysfunction within weeks of getting vaccinated. Several military physicians have shared with me their firsthand experience with a significant increase in the number of young Soldiers with migraines, menstrual irregularities, cancer, suspected myocarditis and reporting cardiac symptoms after vaccination. Numerous Soldiers and DOD civilians have told me of how they were sick, bed-ridden, debilitated, and unable to work for days to weeks after vaccination. I have also recently reviewed three flight crew members' medical records, all of which presented with both significant and aggressive systemic health issues. Today I received word of one fatality and two ICU cases on Fort Hood; the deceased was an Army pilot who could have been flying at the time. All three pulmonary embolism events happened within 48 hours of their vaccination. I cannot attribute this result to anything other than the Covid 19 vaccines as the source of these events. Each person was in top physical condition before the inoculation, and each suffered the event within 2 days post vaccination. Correlation by itself does not equal causation, however, significant causal patterns do exist that raise correlation into a probable cause; and the burden to prove otherwise falls on the authorities such as the CDC, FDA, and pharmaceutical manufacturers. I find the illnesses, injuries and fatalities observed to be the proximate and causal effect of the Covid 19 vaccinations.

38. I can report of knowing over fifteen military physicians and healthcare providers who have shared experiences of having their safety concerns ignored and being ostracized for expressing or reporting safety concerns as they relate to COVID vaccinations. The politicization of SARs-CoV-2, treatments and vaccination strategies have completely compromised long-standing safety mechanisms, open and honest dialogue, and the trust of our service members in their health system and healthcare providers.

According to the latest Public Health England report, the only country with granular weekly data, the COVID-19 case rates are higher per capita among the vaccinated in every age group over 30. Among those in their 40s, the case rate is nearly double among the vaccinated, for a vaccine efficacy – at least against infection – of a stunning -86%.

Not natural
causes. Not
“background
deaths.”

CDC reviewed 14 reports of death after vaccination. Among the decedents, four were aged 12–15 years and 10 were aged 16–17 years. All death reports were reviewed by CDC physicians; impressions regarding cause of death were **pulmonary embolism (two), suicide (two), intracranial hemorrhage (two)**, heart failure (one), hemophagocytic lymphohistiocytosis and disseminated *Mycobacterium chelonae* infection (one), and unknown or pending further records (six).

For a detailed analysis of each death, see [page 56-64](#). While suicide could be considered unrelated, why would any sane person (and all the kids who died were sane) want to vaccinate themselves just before killing themselves? In talking to other vaccine victims, we quickly learn that the reason that so many people commit suicide after getting the vaccine is to end the physical pain caused by the vaccines. All deaths were consistent with the hypothesis of vaccine caused events.

Inconvenient truth

Children are up to 16 times more likely to die with Covid-19 if they've had the Covid Vaccine according to latest UK Health Security Agency report

BY THE EXPOSÉ ON OCTOBER 22, 2021 • (1 COMMENT)

Listen Now

The latest report from the UK Health Security Agency shows that the Chief Medical Officer (CMO) for England's decision to recommend all children over the age of 12 should be vaccinated against Covid-19 was a huge mistake because the data shows children are 16 times more likely to die with Covid-19 if they have been vaccinated.

Vaccinating kids is not just dumb -- it is insane

“Unless virology and immunology are being rewritten, I cannot imagine how mass vaccination of our youngsters and children will not lead to an even more disastrous outcome of all the scientifically irrational and unjustifiable vaccination efforts. Not only will these dramatically increase the children’s risk to succumb to (accelerated) Covid-19 disease but it will also take away the highly efficient capacity of healthy, unvaccinated people to diminish the dangerous, ever rising viral infectious pressure in the population. By vaccinating our youngsters, children and, even more generally, all people in excellent health, we deprive an important part of the population from its ‘anti-viral’ capacity and instead turn them into a breeding ground for more infectious and increasingly NAb-resistant variants. In other words, mass vaccination of children will inevitably obstruct the process of building herd immunity in the population.

There can be no doubt that large scale immune interventions which ignore the immune pathogenesis of the disease are **recipes for massive disasters.”**

Officer Jose Andrade #568

AGENCY CR # ☐ N/A

21-0006115

MANNER OF DEATH:

Undetermined

DATE/TIME RECEIVED:

06/07/2021 14:35

DECEDENT INFORMATION

DECEDENT'S NAME (FIRST, MIDDLE, LAST):

[REDACTED]

AGE:

15 yrs

DEATH INFORMATION

PLACE OF DEATH (Facility Name or Address Location):

[REDACTED]

DATE OF DEATH:

06/07/2021 [Found]

TIME OF DEATH:

14:04 [Found]

SYNOPSIS

The decedent was found unresponsive in his bedroom after his mother was checking on his welfare long after he was supposed to wake in the morning. The decedent was pronounced dead at the scene due to obvious death. The decedent had been in good health with no medical history and had received his second Pfizer COVID-19 Vaccination approximately two days before his death.

The decedent's body was transported to the Sonoma County Morgue Facility, where he was registered for a postmortem examination by a forensic pathologist.

After extensive research, additional testing, and collaboration with numerous other entities, the cause of death was determined to be: **"STRESS CARDIOMYOPATHY WITH PERIVASCULAR CORONARY ARTERY INFLAMMATION (hours to days), due to, UNKNOWN ETIOLOGY IN SETTING OF RECENT PFIZER-BIONTECH COVID-19 VACCINATION (days)."** There were no other significant conditions contributing to the death listed.

Since the etiology of the stress cardiomyopathy with perivascular coronary artery inflammation was unknown but was in the setting of a recent Pfizer-Biontech Covid-19 vaccination, I mannered this death as **"UNDETERMINED,"** which was consistent with the circumstances and cause.

Mother is forced to get vaccinated → child is severely damaged.

The mother had to have a C-section. The hospital said, “We won’t do it if you haven’t been vaccinated.” The mom had no choice.

Now her baby is likely permanently neurologically damaged.

Please watch this video. The same symptoms are common in vaccine victims. For a newborn baby to have these symptoms is unprecedented.

5.2 Unknown Benefits/Data Gaps

The unknown benefits and data gaps associated with the Pfizer-BioNTech COVID-19 vaccine when used in adolescents 12-15 years of age are the same as those detailed in the memorandum authorizing the vaccine for emergency use in for the individuals 16 years of age and older.¹ They relate to:

- Duration of protection
- Effectiveness in certain populations at high risk of severe COVID-19
- Effectiveness in individuals previously infected with SARS-CoV-2
- Future vaccine effectiveness as influenced by characteristics of the pandemic, changes in the virus, and/or potential effects of co-infections
- Vaccine effectiveness against asymptomatic infection
- Vaccine effectiveness against long-term effects of COVID-19 disease
- Vaccine effectiveness against mortality
- Vaccine effectiveness against transmission of SARS-CoV-2

Early treatment

COVID is a lot less dangerous than the flu if it is treated early with existing drugs.

Almost no one had to be hospitalized or die if the CDC or NIH had told people about proven early treatments.

Instead, **they told people to do nothing...**

... because they (incorrectly) believed that the vaccine was the only way to end the pandemic.

So they deliberately suppressed all other options.

We've known successful treatment protocols **since March 2020**

[Dr. George Fareed and Dr. Brian Tyson share early treatment protocol](#)

In India, they showed that if you do a **nasal rinse every night**, nobody gets COVID.

Horowitz: Heavily vaccinated state accounts for 65% of India's COVID cases after rejecting ivermectin

DANIEL HOROWITZ | September 17, 2021

Kerala by contrast...

The Indian state of Kerala has 3% of India's population, and 67% of its inhabitants have at least one vaccination. One would expect Kerala's COVID cases to be so low as to be invisible in a chart of India's very low overall cases. Yet this state of just 33 million people accounted for 65% of all of India's cases on Thursday, and even more in recent weeks. It has essentially been the only state experiencing a surge in recent months. It also happens to be the Indian state that has rejected ivermectin.

Source: [Horowitz: Heavily vaccinated state accounts for 65% of India's COVID cases after rejecting ivermectin](#)

Vaccination is not the solution

Vaccination is **making things worse, not better.**

In Israel, cases reached an **all-time high** after the boosters were rolled out.

Vaccination is not the solution

The same thing is happening in Singapore with an 80% vaccination rate. Just like in Israel, cases are at an all-time high (as of Oct 9, 2021)

Vaccines aren't
the way to solve
this problem

The medical community claims early treatments don't work

Can you see a difference? [AVUC](#) used early treatment to get a [99.76% risk reduction](#); the rest of Imperial County didn't. The CDC isn't interested in exploring.

Which drug would you take if you got COVID?

| | Drug A | Drug B | Drug C |
|-------------------|--------|--------|--------|
| # Patients tested | 6,000 | 385 | 377 |
| Hospitalization | 0.025% | 7.3% | 14.1% |
| Death | 0% | 0% | 2.1% |

You'd should take the one that our government says doesn't work

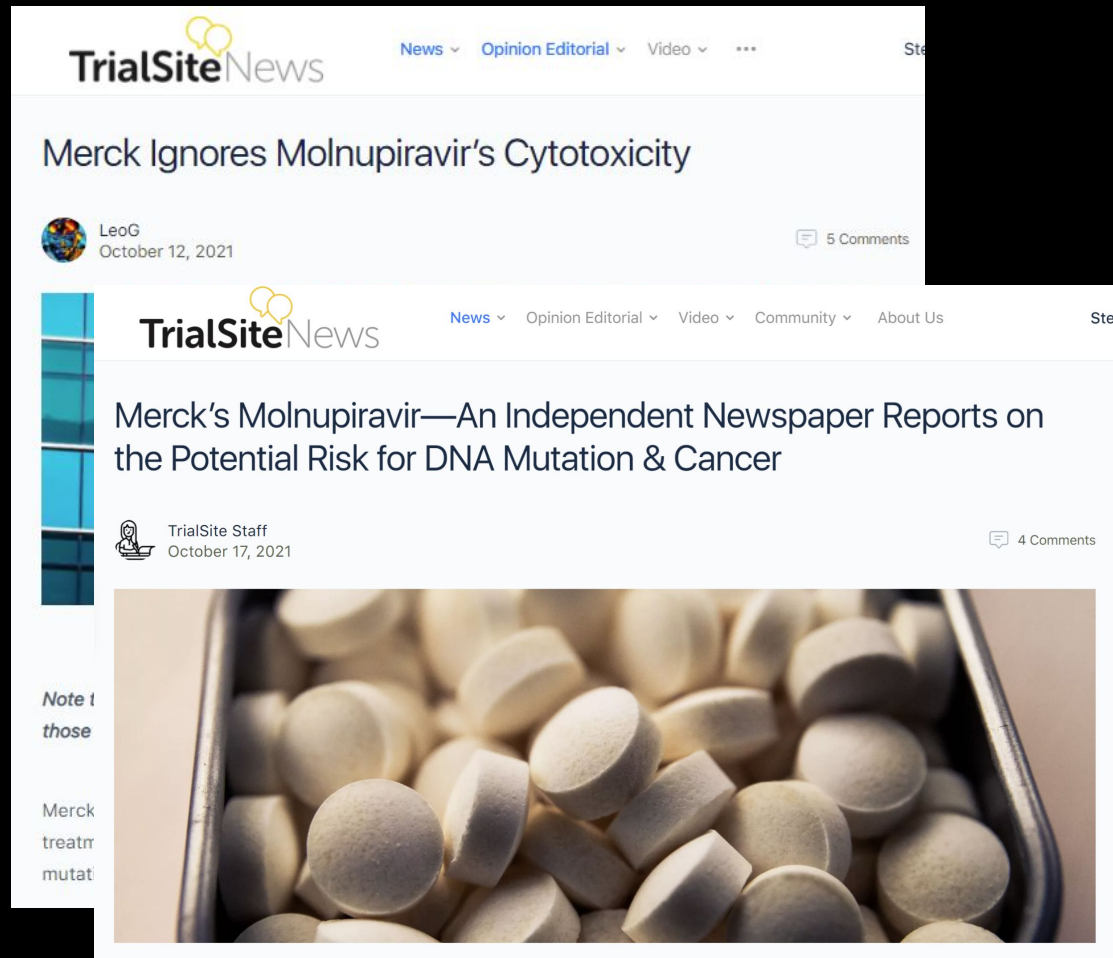

| | Fareed + Tyson | Molnupiravir | Placebo |
|-------------------|----------------|--------------|---------|
| # Patients tested | 6,000 | 385 | 377 |
| Hospitalization | 0.025% | 7.3% | 14.1% |
| Death | 0% | 0% | 2.1% |

Note: The Fareed and Tyson protocol has been available for 18 months but the FDA and CDC are not interested. The key drugs used in the protocol have been around for 40 years so have a proven safety record. By contrast, Molnupiravir has just 30 days of follow up.

You should not take the drug that Merck wants you to take

Source: [Merck Ignores Molnupiravir's Cytotoxicity](#)

[Merck's Molnupiravir—An Independent Newspaper Reports on the Potential Risk for DNA Mutation & Cancer](#)

Early treatment benefits

1. Higher relative risk reduction for all variants ([over 99%](#))
2. Simple prophylaxis protocols be used to prevent infection [with up to 100% success](#) without the use of any drugs whatsoever
3. Greater safety (minor temporary side effects, known safety profile)
4. They lower both all-cause mortality and all-cause morbidity
5. They work equally well on all variants
6. They do not promote escape variants
7. They do not cause [vaccine enhanced infectivity](#)/replication
8. They do not risk original antigenic sin (linked-epitope suppression)
9. They do not cause prion diseases
10. They prevent long-haul COVID syndrome nearly 100% of the time
11. They enable people to acquire recovered immunity which is up to [27X stronger](#) and more durable than vaccine-induced immunity

Hospital treatment should be modified as well

People are dying of COVID in the hospitals because we are treating them with drugs and protocols that are hurting more than helping such as Remdesivir. There are known late treatments that we disallow.

Tweet

Massimau
@masimau

OK, so what do we have here? Two doctors have treated over 7,000 patients and NOT A SINGLE DEATH if treated within 5-7 days of symptoms.

How? Multidrug regimen based on hydroxychloroquine and ivermectin.

Wait a minute! Didn't Dr. Boulware prove in 2020 that HCQ is ineffective?

Dr. Fareed explained that patients can almost always be saved when they start the early treatment cocktail within the first five to seven days of symptoms.

"We have now treated over 7,000 patients and there has not been a single death in patients treated within the first five to seven days of the onset of symptoms. NOT A SINGLE DEATH. This (series) includes patients with multiple comorbidities as well as patients in their nineties!"

- Protocol 1 uses of hydroxychloroquine, an agent with antiviral reactivity against SARS-CoV-2, two antibiotics (azithromycin, doxycycline) along with aspirin and a multivitamin pack (including zinc, vitamin C, vitamin D, and others), and with selective use of one or a combination of inhaled budesonide, dexamethasone, prednisone, colchicine or other treatments deemed appropriate.
- Protocol 2 includes all of these options, plus ivermectin where deemed appropriate by physicians.

ASK YOURSELF

Have you ever heard of anyone who got treated early with a proven early treatment protocol ever die from COVID?

Dr. George Fareed has treated over 7,000 COVID patients. 0 deaths for anyone who got treated early.

The one thing all the people in the hospital for COVID today have in common is none of them were treated early with a proven early treatment protocol such as [the Fareed-Tyson protocol](#) with a [99.76% risk reduction](#) and no deaths or disabilities from the treatment or COVID. It works equally well for all variants.

Rochelle Walensky will never say that. Not in a million years. They won't call Fareed. Ever.

**Q: Do you know why there
are vaccine mandates?**

**A: Because no sane person
would take it without coercion**

Censorship

THE PUBLIC WANTS A DEBATE ASAP

... but the CDC and FDA refuse

and both outside committees [refuse to defend the CDC claims that the vaccines are safe](#).

Steve Kirsch ✓ @stkirsch

Challenge to the Scientific Community – It's Time for Honest and Open Debate on Vaccine Safety

TrialSite Staff
 September 28, 2021

46 Comments

Like 365
 [Share](#)

TrialSite has published articles that counter the mainstream narrative promoted by the CDC, NIH, and the US government. While we have been criticized, we believe that transparent and open debate is the best way to uncover the risks as well as the benefits. The authors we have presented on TrialSite are experts in their fields with decades of experience and impeccable credentials. Silencing scientists and physicians with smear campaigns, bans, and threats strikes us as Un-American, and contrary to the public interest.

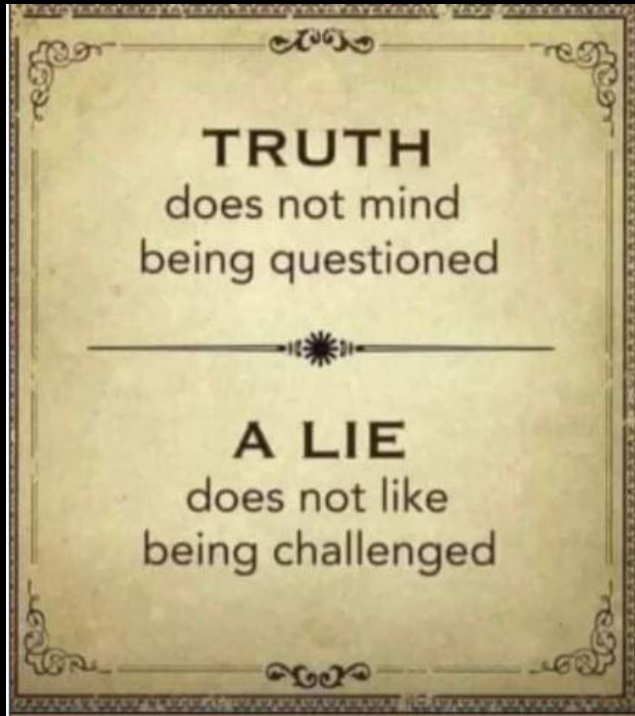

NO
RESPONSE

NOBODY WILL DEBATE US ON THE SCIENCE

No authority figure who is promoting the false narrative will debate any of us in public on vaccine safety. Rochelle Walensky, Tony Fauci, Eric Topol, Bob Wachter, Monica Gandhi, Lena Wen, Chris Cuomo, Sanjay Gupta, ... you name it. None of these so called "vaccine experts" will accept an open fair debate on the science.

They don't want to be embarrassed for misleading people. They all want to silence my team. It's their only option. See diagram at left.

Note: There was a Trinidad official (Minister Hinds) who made the mistake of accepting a debate with me on vaccine safety and [he lost badly...very badly](#). When things weren't going his way, I was locked out of the Zoom call by the radio station so they could do ad hominem attacks on me after I was booted since they couldn't attack the science.

One of the comments

lharnisch331

October 4, 2021

Personally, I have found that often what isn't being addressed is often far more informative than what is being addressed.

My concerns as a scientist and researcher involved in clinical research trials throughout my career is that the normal process of questioning everything and evaluating information on any relevant issues associated with the treatment **have been completely blocked**. The possibility of rational discussion regarding COVID-19 vaccine safety **is not available** and the simple act of raising questions or concerns has become **riddled with threats** to an individual's career. This is not science nor is it the practice of medicine. It is **appalling that we are unable to even have the discussion** let alone resolve the questions without being blackballed or threatened with a loss of licensure.

Kudos for putting the challenge out however I am afraid that it will be met with the wall of silence that defines this moment in time for anyone who dares have a narrative different from the accepted one being presented to the world.

The sad fact is that **if you actually were concerned about science**, medicine, public health, or solutions to the pandemic-driven issues, **you wouldn't take this approach**. Stopping discussions, creating categories of taboo questions, and threatening those who want explanations for logical, scientifically sound questions only fuels the conspiracy theorists fires...

Censorship required

The methods the US government uses to suppress the truth includes spreading misinformation, intimidation, mandates, and censorship.

Our government is deliberately ignoring early treatments; they tell everyone that early treatment don't work. They demonize the key treatment used by India to be COVID-free. Their agenda is to push the vaccine, not to cure COVID.

Social media companies will censor, demonetize, and/or ban you for telling the truth. If you are a doctor, you can have your license revoked if you say the vaccines are unsafe. This way, the public "believes" that the vaccines are safe since no doctor is speaking out against it.

Dr. Robert Malone

You replied to this message on 9/7/2021 4:53 PM.

THE FDA COULD NOT DISPUTE WHAT I WROTE

I wrote a [34-page document that was submitted to the ACIP panel](#) (the CDC panel on vaccine safety). The FDA refused to address any of the points and just said that they disagreed with what I wrote about VAERS **without citing any evidence of a mistake**. They ignored everything else I wrote like the fraud in the Phase 3 trials, the lack of autopsies, the fact that there were 5 other methods that didn't use VAERS at all and it found the same thing. They didn't cite any evidence that their analysis was correct. They just made a "hand waving" assertion about VAERS (which was wrong). **They will not discuss this further.** They don't want to hear that they made a mistake.

Dear Mr. Kirsch,

While your email was not directly addressed to FDA, we would like to note that we do not agree with the analysis put forth in your comment, as we believe the data from VAERS that you reference were not properly interpreted. This is due to the limitations of VAERS itself, as well as limitations regarding certain private patient information that is not available to individuals outside of the FDA and CDC, as we noted in our correspondence to you dated July 27, 2021.

FDA and CDC have multiple systems in place to monitor the safety of COVID-19 vaccines, including VAERS. We continue to find that the COVID-19 vaccines have a favorable benefit-risk profile, supporting their use under Emergency Use Authorization. Additionally, FDA's approval last week of Comirnaty (COVID-19 Vaccine, mRNA) followed a determination that the vaccine is safe and effective in preventing COVID-19 in individuals 16 years of age and older.

Sincerely,

Lorrie H. McNeill

Do you care about vaccine safety and misinformation?

Steve Kirsch

To: Steven Anderson (steven.anderson@fda.hhs.gov)

Cc: Peter Doshi ([REDACTED]@rx.umaryland.edu); Jessica Rose ([REDACTED]@protonmail.com);

Mathew Crawford ([REDACTED]@gmail.com)

Bcc: Robert Malone ([REDACTED]@gmail.com)

This message was sent with High importance.

Hi Dr. Anderson,

My presentation is now getting millions of views worldwide... this is just ONE example... 10K retweets which is about 3M views. see below. It's probably around 20M views worldwide by now.

I wonder if you are ever going to respond to me so we can talk about my analysis?

If you think it is wrong, I'm happy to retract it if you can show evidence that I made a mistake. I'm not into spreading misinformation so far, all I get is hand-waving arguments.

If I don't hear from you, I will presume it is because you are unable to find a problem in my analysis.

Surely, you must be as interested in getting the CORRECT answer as I am. So you must know the correct number of excess deaths by now.

Please respond to this email with the correct number of deaths and the analysis of the evidence to back it up.

And we found a serious error in your safety signal algorithm used by the CDC. I was shocked that NOBODY followed up on that. Why is that?

I'm cc'ing Peter Doshi of the BMJ who I'm sure is very interested in hearing your response since this controversy is of great public importance to the world.

-steve

9:51 PM

FDA'S STEVEN A. ANDERSON DOES NOT CARE IF YOU DIE

I saw a video of Steven A. Anderson of the FDA where he says he's in charge of safety monitoring at the FDA for the COVID vaccines.

I called Dr. Anderson multiple times and sent him and his staff emails multiple times. I was ignored. I was trying to tell them we found safety signals that the FDA had missed.

Jessica Rose is one of the world's leading experts on VAERS and is a team member.

Dr. Anderson never responded. Attached is the latest attempt to expose the truth.

RE: Public debate on vaccine safety issues?

Dr. Gandhi,

Since I haven't heard back from you, how about if I donate \$20K to fund your research in exchange for agreeing to debate me on vaccine safety. My claim is that the vaccines are unsafe for all ages.

My view that the vaccines are not safe are now getting huge traction around the world since I testified at the FDA meeting on Friday. If I'm wrong, it's important to correct that misinformation ASAP. The best way to do that is a debate.

It's an opportunity for you to show the world I'm wrong in a recorded debate.

That would be a great public service since it would reduce vaccine hesitancy.

Will you accept? If not, please let me know why not. I'm baffled you'd not want to correct the "misinformation."

UCSF's Monica Gandhi won't respond

When CNN calls, Monica also has time to talk to them. It's all softball questions.

But when I ask her to challenge me in a recorded debate on whether the vaccines are safe, she won't answer my emails.

Allegedly, I'm a threat to society because I am spreading misinformation to millions of people.

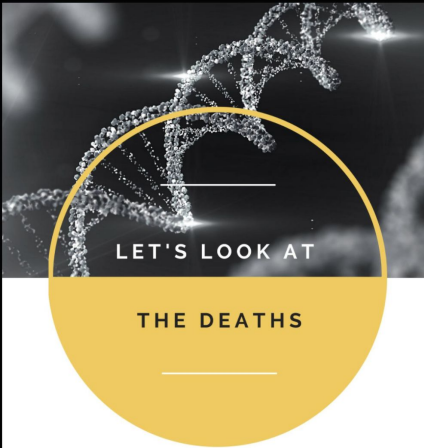

If that is true, then why doesn't Dr. Gandhi stop me? The most effective way to do that is to debate me and prove to the world I'm wrong.

But you see, she can't do that because she knows I'm right. That is why she won't debate me. Ever. Not for all the tea in China.

AT THE VERY LEAST...INFORMED CONSENT

Why not require everyone to **read this “informed consent” booklet** (all 106 pages) prior to being vaccinated? At least this way, they will understand the risks.

ABOUT BLOG PROJECTS HELP DONATE CONTACT JOBS VOLUNTEER PEOPLE

LET'S LOOK AT
THE DEATHS

Did you know 19 volunteers in the two trials died?
Many more died in the first weeks of the rollout but none of the vaccines were halted.

TAKE ACTION

Businesses should **stop complying** with the vaccine checks and masking orders. They are **nonsensical**.

Demand the school boards do not comply with the mandates on vaccination and mask wearing.

VOTE for politicians who support what the data says

SUMMARY

The vaccines kill more people than they save.

Nobody will debate us.

Early treatment can get us to zero COVID: Uttar Pradesh vs. Kerala. It is better on every metric.

Fareed-Tyson protocol is 99.76% effective.

The one thing every hospitalized COVID patient has in common: they didn't use a proven early treatment protocol.

Nobody in America likes to admit they were wrong.

We can start by demanding the school boards do not comply with the mandates on vaccination and mask wearing.

Early treatment is ignored

Uttar Pradesh is now COVID free because they embraced early treatments.

Unfortunately, in the US, the NIH says these don't work despite multiple systematic reviews and meta analyses published in peer-reviewed journals, the highest level of evidence-based medicine (EBM).

The FDA ignored all this data. The vaccine is the only solution they will consider in their risk benefit analysis. NOBODY in the VRBPAC advisory committee said one word about early treatment in their meeting on Sept 17 when they approved a 3rd dose of Pfizer for those over 65. They don't believe the vaccine causes any deaths at all and they can't explain any of these anecdotes.

**Here's how we compute
the 2:1 ratio that shows the
vaccines are nonsensical**

V:C defined

V:C is the ratio of the the number of vaccine-caused deaths per million doses (V) relative to the projected number of COVID deaths that could be saved by the vaccine over a 6 month period per million doses (C).

A number like 2:1 means we kill 2 people for every COVID death we save. That's bad.

V:C viability

For a COVID vaccine to be viable, we need a V:C of 1:x where $x > 10$, i.e., you want the risk to be small compared to the benefit.

If you are saving the lives of >100,000 people, you don't want to have to kill >10,000 people to have to do that. That would be unconscionable in a civilized society and would be unprecedented in modern times, especially when we have a viable alternative--early treatments that work with over 99% risk reduction that don't have any safety issues.

V:C varies by place, time, age

V:C depends on the vaccine type, the rate of COVID deaths in your community at a particular time, and your age. For this presentation, we'll compute this as a country-wide average for the US.

Is the vaccine safe for some age groups?

The vaccines may have a positive risk / benefit for people in a certain demographic.

The CDC and FDA think the vaccines are perfectly safe and have killed no one, so they have never done this analysis. For example, the VRBPAC unanimously approved boosters for people over 65.

None of the panel members made the risk-benefit calculation. They were guessing.

Were they right? No. They were dead wrong based on both our calculations and the real-world evidence.

Here's what [the detailed calculations showed...](#)

Pfizer is the safest of the three vaccines

In general, the three vaccines in the US work through a very similar process.

The vaccines have an [estimated death rate of close to 1 death for every 1,000 people who are vaxed](#). All of them kill more people than they are likely to save over a 6 month effectiveness period.

Pfizer is the safest, Moderna and J&J are much more dangerous ([see the comparison](#) for sources).

| Vax type | Doses delivered (M) | VAERS US deaths | D/M | Deaths per fully vaccinated per M |
|----------|---------------------|-----------------|------|-----------------------------------|
| Pfizer | 218.8 | 3033 | 568 | 1,136 |
| Moderna | 149 | 3023 | 831 | 1,662 |
| J&J | 14 | 675 | 1977 | 1,977 |
